PROJECTS

➤ MASS EMAILING WEBSITE: (7/2020 - 8/2020)

In this project I has made 2 interfaces:

- 1) Landing page for customer to enter their email.
- 2) Sender's panel with authentication from where sender can compose and send email to all the email IDs in one click and can also download the whole filtered(duplicate emails will be excluded automatically) email list in XLS or CSV .

Technologies used HTML, CSS, Django

➤ Team Project:- **IoT based Wearable For Real-Time Accidental Fall Detection and Health Monitoring of Remote Maintenance Workers:**

(4/2020 - 8/2020)

In this project, I worked with *Django* in the backend part where all the data about the worker like temperature, height from the ground, etc get collected from the sensors

SOME MINI PROJECTS

- Responsive Card with animation.
- Responsive creative toast notification.
